Evolution of digital technology including our ability to collect, store, analyse and share vast quantities of data is enabling risk managers to explore new and exciting ways through which to manage risk.

This forum seeks to explore this revolution through topics including:

- Getting computers to do the grunt work
- The role of AI versus Human Intelligence (of the risk manager)
- Predicting the future....are we getting better at it?
- Turning risk analysis into decisions and actions: computers v. the risk manager
- Can a computer manage your reputation?
- Embracing our humanity – what does technology free humans to do?
